

Always On

Overview:

A solution to deliver secure, seamless and simplified mobile working that will help improve productivity, save costs and facilitate the benefits promised from flexible and mobile working.

- It delivers a constant data connection whilst mobile devices roam across different bearer networks.
- It manages multi-tier authentication into a single sign-on process that meets Corporate Security Policies.
- It takes the issue of connectivity, repeated reconnection and appropriate network choice away from the end users, considerably simplifying the whole experience of mobile working.
- A powerful reporting platform provides operational and usage reporting at organisational, divisional and individual level to demonstrate the effectiveness of deploying mobile working.
- It allows key front-line staff to get on with their job whilst adopting mobile working technology.

The days of accessing your corporate network and business applications from a single static location are long gone. Today's increasingly mobile workforce demand a solution capable of maintaining a constant connection, enabling them to roam across and between networks. In order to maximise workforce efficiency, secure, seamless and ubiquitous access using state-of-the-art wireless network and data protection is required.

The Always On mobility solution has been designed to provide customers with the ability to mobilise their workforce, applications and tools to measure associated productivity gains. As a fully integrated mobile VPN gateway/client solution, Always On employs an appliance-based design coupled with a software client to deliver unequalled security, reliability, easy deployment and integration within your existing environment.

The result is secure, ubiquitous network connectivity and application session persistence, enabling you to keep your mobile workforce protected and connected to their enterprise data.

Reasons to have Always On:

- It takes the issues of connectivity, repeated reconnection and appropriate network choice away from you the customer, considerably simplifying the whole experience of mobile working
- A powerful reporting platform provides operational and usage reporting at organisational, divisional and individual level to demonstrate the effectiveness of deploying mobile working
- It allows key front line staff to get on with their job whilst adopting mobile working technology
