

BT Business Engineer Install

Overview:

BT Business Engineer Install provides customers with on-site set-up and configuration of their BT Business Broadband service by a trained professional, configuring one or more PCs. Perfect if customers are having trouble getting connected, starting out, relocating, or simply upgrading their technology.

Our engineers can physically connect all the cables, install hub and filters, set up software and demonstrate the service to the customer. It gives businesses an easy, hassle-free way to get connected to the internet, giving them more time to spend on what they do best – running their business.

The specialist engineer will:

- Connect one PC to the hub and the hub to the broadband line
- Check for connectivity and diagnose any faults
- Set-up up to 10 POP3 email accounts
- Activate Broadband Voice if ordered
- Install BT Security Software if ordered

If you require connection of additional PCs or set-up of additional components such as printers or scanners, our engineer can do this all in the same visit for an additional charge. They can also help with any external wiring changes that may be required.

Reasons to choose Business Engineer Install:

- Designed to provide businesses with a simple, hassle-free way of getting connected to Broadband
- Saving your business time and money
- Offering additional support for set up of software, additional PCs, connection of printers or other peripherals

Price:

- £109 (excl. VAT) for one PC
- Each additional PC is charged at £35 (excl. VAT). These can be connected on request to either the business hub by Ethernet or by Wi-Fi if the customer's PCs have Wi-Fi capability
