

Supply Solutions from BT Engage IT

Overview:

The majority of IT budgets are still spent on the procurement of IT hardware and software. Providing an efficient procurement process is key in delivering an effective IT strategy that can meet ever tighter deadlines from increasingly demanding customers. Second-best pricing or poor quality logistics can lead to significant business inefficiencies and the loss of business and customers.

BT Engage IT has been working with businesses for over 30 years, providing industry-leading and award-winning IT hardware and software supply. We hold strategic partnerships and leading accreditations with key vendors including hp,[®] IBM,[®] Lenovo,[®] Toshiba,[®] Microsoft,[®] Cisco,[®] VMware,[®] Citrix,[®] Symantec[®] and Red Hat amongst others.

Access to these partnerships provides our customers with leading tier-one pricing, better stock availability, faster quotes and, in conjunction with Transact our web-based procurement and reporting tool, best practice around complete Supply Chain Management. We help our customers to free up their time to focus on their businesses.

Price:

Cost is dependent on requirements and on the solution purchased.
